

Roman Semenov

Backend developer

Saint Petersburg, Russia

- roman@semenov.tk
- <https://t.me/pomah3>
- <https://github.com/pomah3>

Skills

- C++, Python, JavaScript, Java
- Bash, Git, Docker, Django, NodeJS
- Basic knowledge of network protocols, Linux server administration
- Basic competitive programming skills (algorithms, data structures)

Education

ITMO University | 2020–2024

Information and communication technologies

Currently in first year of studying

Projects

Mind

2018-2019

PHP, Laravel

<https://github.com/pomah3/mind-laravel>

This is e-school service for my lyceum. I was responsible for all backend part, including architecture, API development and CI/CD organisation.

Edu.tatar parser

2019

NodeJS, Express, VueJS

<https://github.com/pomah3/edu-tatar-parser>

It's training project written for learning how parsers work. E-diary service of my region named 'Edu.tatar' doesn't provide API, so I've made my own by parsing their website.

Websocket Tic Tac Toe

2021

NodeJS, Express, VueJS

<https://github.com/pomah3/tictactoe>

It's training project written for learning WebSocket and VueJs technologies. When player opens main page, he is put to the queue, and when rival is found game starts.

Achievements

- Regional stage of Russian National olympiad in Informatics; 2020; prize-winner
- All-Russia project competition "Big Challenges"; 2019; winner
